

INTERNATIONAL WORKSHOP CALL FOR PARTICIPATION LIVING MODERN ARCHITECTURAL HERITAGE IN THE AGE OF SUSTAINABILITY : ambiances and quality of use

L'HABITAT MODERNE REVISITÉ PAR LA VILLE DURABLE : AMBIANCES ET QUALITÉS D'USAGES

The workshop will be dedicated to understanding atmospheres in the quality of use of four sites in Bordeaux, and in the renovation projects they occasionally undergo:

What does living in these flats or houses imply in terms of comfort, perceptions and everyday use (spatial quality, mobility)?

What can we learn from the optimizations they underwent to improve comfort and reduce energy consumption?

How can energy efficiency be achieved while taking into account the original architectural and practical qualities of these operations?

May 29th > June 1st, 2017

INTERNATIONAL CONFERENCES

with researchers and architects specialized in Modern Housing, in terms of daily uses, ambiances and sustainability
