LEATHER MASTER

Leather Master
is a product line
developed by the
Uniters Research
Centre for cleaning,
protecting, and
repairing the surface
of leather upholstery,
leather goods and
apparel.

This line includes
cleaning products
developed for all
types of leather
(aniline, nubuck and
protected leathers)
as well as leather
repair products for
both consumers and
professionals.

LEATHER

Leather is one of the oldest materials known to man.

Here are a few reasons why leather has always been so popular.

- Leather is extremely strong, it takes more than 180 kg/Lbs of pressure to puncture leather-covered furniture.
- Leather resistance to tearing is legendary. That is why breastplates, belts and shoe laces are made of leather.
- By nature it is not flammable. Leather is the only material that can be used in the aircraft industry without the addition of further flame-resistant products.
- If treated correctly, leather lasts for an incredibly long time. Most experts give leather an average life four times longer than that of textile products. And ageing gives added dignity.
- Leather does not cause allergies. All dust particles can be eliminated from leather, so it is perfect for people who are allergic to dust.
- You can sit on leather without feeling hot or cold. Leather remains at room temperature until it comes in contact with your body, then adjusts to your body temperature.
- There are countless possible colour variations, effects, structures and reliefs. Leather is so versatile that it can be used in fashion, for furniture, for car upholstery, for shoes and bags, etc.
- Leather is a prestigious article. Leather is offered for articles such as furniture or car upholstery. The leather version is outstanding for its quality.

LEATHER TYPES

In order to use Leather Master products correctly and to obtain the maximum cleaning and protection results, it is essential to be able to recognise the various types of leather (aniline, protected, nubuck), thus avoiding the use of products where not suited.

Leather Master works in collaboration with many upholstery manufacturers in classifying their leathers into the following three basic categories:

- ANILINE - cleaning code A
- PROTECTED - cleaning code P
- NUBUCK - cleaning code N

ANILINE: cleaning code A

also called Natural, Pure, Naked or Unprotected.

These Leathers are colored with transparent dye stuff. This means that you are able to see the actual surface grain and markings. It's as if you are looking through a colored lens. These Leathers have very little or no protective treatments applied to them. The most common thing to do is to spray a wax finish on the surface that gives short term water repellance. The actual way that the Leather is made varies from tannery to tannery.

Every picture tells a story...

...and how the cow lived and under what conditions, each hide directly reflects the effects of these conditions. If you look closely, you can see healed scars, scratches, wrinkles in color, texture, some small wrinkles, and even occasional bites from insects. All of these natural markings are the signature of your leather. These heavy marks highlight the difference between a natural product and man-made materials. Your efforts to protect the grain, color and maintenance will help your ANILINE leather meet your expectations.

Leather Type - ANILINE Leathers
Cleaning Code - A
Characteristics:
Hand of Grain - Leather
Natural Wrinkles - Natural
Resistance to Fading - Low
Color - Varies in color
Cleanability - Moderate
Cleanability is maintained through use of Leather Master Protection Cream.

Care Tips For Aniline, Natural, Unprotected, Pure Or Naked Leathers

- Try to maintain at least two feet between your furniture & heating sources. Prolonged exposure to heat vents or radiators will cause drying out of your leather.
- Avoid placing your furniture in direct sunlight. All materials will fade over time when placed in direct sunlight. ANILINE leathers are especially sensitive to sunlight. Do not place ANILINE leather in windows or under skylights.
- Like all items in your house, Leather can accumulate dust. Lightly dampen a soft cloth with the Leather Master Soft Cleaner and dust weekly. You may also use the soft brush attachment on your vacuum. You may fully remove dust particles from ANILINE leather's surface, making them ideal for dust sensitive persons.
- All leathers perform better when preventative maintenance is practiced. For ANILINE leathers, apply Leather Master Protection Cream to the surface of the leather to help resist staining and prevent overall soiling. Pay particular attention to protect high use areas like: seats, arms and backs.
- As a general rule, fully clean your furniture with Leather Master Soft Cleaner at least every six months to remove dirt as well as the gradual accumulation of body oils and perspiration. ANILINE leathers require more frequent cleaning when placed in high use areas like a TV room. After cleaning, reapply Protection Cream to the leather to renew the protection level.

Leather MASTER
Developed by Dr. York

Generally this is how aniline leathers are made

1. The Leather is tanned, then dyed to a 'crust' color.
2. Often, the surface is sprayed with additional Aniline dyestuff in an attempt to even out the coloring.
3. It is possible that additional treatments are done to create looks like sauvage, pull-up, wax crackle, and shrunken grain.
4. As a final step, sometimes a light protective spray (such as wax or fluorocarbon) is applied to give the Leather light resistance from staining.
5. Steps are taken to soften the Leather either by massaging machines and/or by tumbling.

Ways to identify aniline

For care and maintenance purposes we need to know if the surface has been brushed (has a texture like velvet) or not. This is the point at which people have difficulty distinguishing Nubuck from Aniline. There are several ways you can identify an Aniline Leather:

1. Lightly scratch the surface to see if it leaves a lighter color scratch mark. If it scratches to a lighter color, it is Aniline. This is not the only test to do because some Nubucks will do this also.
2. Wet your finger and lightly rub it into the Leather to see if it turns a darker shade. It should darken lightly, but dry invisibly.

These are the best tests that you can do in the field. With time you will be able to identify Aniline Leather visually and by feel.

PROTECTED: cleaning code P

also called *Finished, Semi-Aniline, Everyday, Pigmented or Painted*.

These Leathers have combined the best aspects of a natural product (Leather) and have utilized tannery technology to create a product that is more uniform in appearance and colour (due to the application of pigments to the surface). It then has a finish applied to the surface that makes the Leather more resistant to the effects of heavy use. The pigments and finish applied to the Leather do affect the soft hand somewhat. The more finish that is applied the less soft is the Leather.

What determines the amount of pigment and finish needed is:

1. The color of the Leather (all light colors require more pigment to cover the surface).
2. The selection of the Leather (lower grade selection requires more mechanical correction).

3. The desired level of resistance the finish needs (automotive requires the highest)

Protected Leathers are the most common Leathers, and for most consumers the most practical.

Generally this is how protected leathers are made

1. The Leather is tanned, then dyed to a crust color.
2. Depending upon the selection of the hides, the Leather is either partially or heavily machined and buffed to even out and hide the natural markings.
3. Pigment is applied to the Leather either by spraying or roller coating method.
4. Depending upon the article, partial or full embossing of grain may be done to the surface.
5. Finish is applied to the Leather to provide rub resistance and to seal the pigment.
6. Steps are taken to soften the Leather either by massaging machines and/or by tumbling machines.

Every picture tells a story...

...of how the care level and under what conditions. Each hide directly reflects the character of life on the range. Take a look and you'll be able to see brand, age, color shading, and various grain & visible patterns. All of these natural markings are the signatures of genuine leather. These beauty marks highlight the difference between a natural product and man-made materials. By adopting a routine care and maintenance plan and following the best care tips for PROTECTED Leathers, you will help keep the Leather clean and the surface protected, helping the Leather meet your expectations.

Leather Type - PROTECTED also referred to as: FINISHED, PIGMENTED, EVERYDAY, SEMI ANILINE & ANILINE PLUS Leathers

Characteristics: Hand or Grained - Visible Natural Markings - Stable Color - Usually Contains Resistance to Fading - Good Cleanability - Leather

Care Tips For PROTECTED type, also referred to as: Finished, Pigmented, Semi Aniline, Aniline Plus & Everyday Leathers

- Try to maintain at least two feet between your furniture & heating sources. Prolonged exposure to heat vents or radiators will cause drying out of your leather.
- Avoid placing your furniture in direct sunlight. All materials will fade over time when placed in direct sunlight. PROTECTED Leathers are more resistant to sunlight, but take proper precautions.
- Like all items in your house, Leather can accumulate dust. Lightly dampen a soft cloth with the Leather Master Soft Cleaner and dust weekly. Also, you may use the soft brush attachment on your vacuum. You can fully remove dust particles from PROTECTED Leathers, making them ideal for dust sensitive situations.
- All Leathers perform better when preventative maintenance is practiced. Apply Leather Master Protection Cream to the surface of the leather to assist resisting staining and soiling as well as preserve the surface. Regular use of the Protection Cream will greatly improve the cleanability of PROTECTED leathers and assist in resisting ground in stains like blue jeans and newspaper print.
- Fully clean your furniture with Leather Master Soft Cleaner every six months to remove dirt as well as the gradual accumulation of perspiration and body oils. Pour the Soft Cleaner into a soft sponge and squeeze to produce a foam. Scrub the leather with the sponge and the foam, then wipe the surface with a clean cloth to remove soiling. After cleaning, apply the Protection Cream to the leather to renew the protection level. For ballpoint ink marks use Leather Master Ink Lifter.

Leather MASTER
Developed by Dr. Tark

Ways to Identify Protected

1. Lightly scratch the surface to see if it leaves a lighter color scratch mark. If it does not scratch to a lighter color (this means the color remains the same), then this is a Protected Leather.
2. Use Soft Cleaner and clean the Leather. The cleaner should stay on top of the finish and should not darken the Leather.
3. The surface should have some sheen level to it. It is like looking at wood that has a lacquer finish compared to a wipe-on oil treatment.

LEATHER TYPES

NUBUCK: cleaning code N

also called Distressed, Bomber or Brushed.

This leather starts out as an Aniline leathers which the surface has been brushed or sanded, and have created a texture similar to a velvet on Leather. Many people confuse these with Suede Leather. Suede is the flesh side of a piece of Leather, and Nubuck is an effect that is done to the grain side, making it incredibly soft.

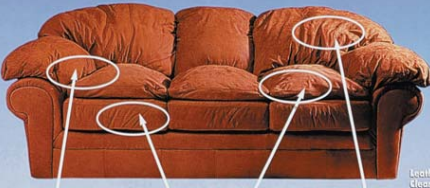

Creating a nap on the leather makes it even more absorbent than Aniline Leathers.

Generally this is how Nubuck Leathers are made

1. The Leather is tanned and dyed to a crust color.
2. Then the surface is brushed with fine brushes or sands that cut the Leather and create a nap or velvet texture.
3. Sometimes, additional Aniline dye stuff is applied to the surface to even out or enrich the color.
4. Depending upon the article, stamping of a grain or print effect may be done.
5. Fixation agents are sprayed on the surface to seal the color and prevent transfer, or a fluorcarbon treatment is applied to protect the leather.
6. The Leather is tumbled to bring out the Nubuck effect and maximize softness.

If you are a manufacturer or retailer and you wish to use each type of our Cleaning Codes, please contact us directly.

Every picture tells a story...

...and how the cow lived and under what conditions. Each also directly reflects the effects of the on the target. If you look closely you can even detect tears, staining, scuffing, to some extent even aging and even "character" lines from moths. All of these natural markings are the leather's "signature". These markings are not the difference between a natural product and man-made "imitation". They define the leather's true and authentic quality. They will help you identify the leather's true characteristics.

Leather Type - NUBUCK
Cleaning Code - N
Characteristics - No Hand & Gemset - Excellent Natural Markings - Visible Visible - Staining is minimal. Difficult to Clean - Low Chemicality - Moderate Vacuuming is recommended. Application of Leather Master Nubuck Protector.

Backbone **Healed Scars** **Scratches** **Natural Wrinkles**

Care Tips For Nubuck, Chaps, Distressed, Buckskin, or Suede Leather

- 1. Try to maintain at least two feet between your furniture & heating sources. Prolonged exposure to heat vents or radiators will cause drying out of your leather.
- 2. Protect your furniture from all forms of sunlight. **All Nubuck Leathers will fade** when placed in sunlight. Do not place your furniture in windows, under skylights, or in places that will put your furniture in sunlight.
- 3. All leathers perform better when **proactive maintenance** is practiced. Treatment of the surface with Leather Master Nubuck Protector will greatly improve the leather's resistance to staining and soiling. It is most important that you treat the high use areas like seats, arms, and backs.
- 4. **Keep the leather dirt-free with weekly vacuuming.** Use Leather Master Nubuck Cleaning Cloth to pick up surface soiling and return the leather to its original look and feel. Simply wrap the cloth around a soft dry sponge and rub the leather in several directions to lift soiling and renew the Nubuck effect. This will also reverse flat and shiny areas that appear from use.
- 5. For water based stains, use the Leather Master Nubuck Cleaner. Apply the cleaner to a wet sponge and squeeze to produce a white foam. Gently work the foam into the area with the sponge. Allow to dry and use the Nubuck Cleaning Cloth to renew the Nubuck effect. Then apply Nubuck Protector. For oil based use Leather Master Degreaser.

Leather MASTER
Developed by Dr. Turk

Ways to identify nubuck

1. The surface should have a texture similar to velvet.
Move your hand across the surface of the leather to see if shading are traces similar to the effect when you vacuum a carpet in one direction and then in another, if so, it is Nubuck.
2. Wet your finger and rub it lightly on the surface.
The surface will darken and also will dry to a slightly darker shade.
3. For waxed surfaces, rub an area of the Leather with a sponge several times. This will remove the wax and let you see if the Leather meets 1 or 2 above.

Nubuck Leathers can reflect the natural Leather grain or have an endless variety of embossed patterns applied to them, and color vividly. This is why this type of Leather is also very popular for the fashion industry.

Only your customer decides how long his leather will last.

THE LEATHER MASTER SYSTEM

Cleaning and protection, these are the regular needs required for leather. Most people feel they need to nourish their leather. Unfortunately you cannot nourish most leather types.

Cleaning - eliminating dirt and removing stains for a leather sofa that is always clean and that maintains its attractive appearance.

Protection - to guarantee the original quality of the leather and to maintain a sofa that looks new even after years of use.

Leather Master System is based on 2 products: Leather Soft Cleaner and Leather Protection Cream. The combined use of the two products guarantees the perfect cleaning of your sofas as required, plus essential leather protection.

LEATHER SOFT CLEANER

Leather type for A - P

Leather Soft Cleaner is a waterbased cleaner that can be used on Leather types A and P. This is a mild cleaner that will not affect the original properties or finish of the leather.

Leather Soft Cleaner will clean soiled as well as waterbased stains. Most cleaners contain solvents like alcohol or mineral spirits.

These types of cleaners will definitely clean, but also will attack either the finish or dry the Leather out.

Leather Soft Cleaner is solvent free and works without removing finish or harming the Leather. The only time that Leather Soft Cleaner could remove color or change the Leather is under the following circumstances:

1. If the Leather is not colorfast to any type of liquid. You can test this by wetting a soft, white cloth with distilled or purified water and wiping the Leather. If color comes off on the cloth with the use of purified water, Leather Soft Cleaner or anything else will also remove color.
2. If the Leather Soft Cleaner appears to have darkened the Leather, it is extremely absorbent. The Leather has shrunk. The Leather has not gotten darker, but each dot of color has gotten closer together, thus giving the appearance of becoming dark. All you need to do is to stretch the Leather by pulling it in all directions. You will see the color lighten.

LEATHER PROTECTION CREAM

Leather type for A - P

Also available: Leather Protection Cream Gloss and Leather Protection Cream Matt.

Leather Protection Cream is a water based protector for all Leather types except Nubuck. This is truly an incredible product because it provides excellent protection against oil-water-alcohol based stains as well as help to resist the effects of daily soiling.

The Leather Protection Cream places an invisible, breathable barrier between you and your Leather. Our system is for you to protect your Leather first, then follow a routine of cleaning and re-protection.

This way you are not actually cleaning the Leather's original surface, but cleaning from the surface of the protection. Since some Leathers are very porous, the Leather Protection Cream prevents stains from absorbing deeply into the Leather and becoming nearly impossible to remove.

Usually, Protected Leathers that have cracked or peeled is not from use, but from body oils and perspiration that have settled down into the grain of the Leather and started to dissolve the finish over time. The Leather Protection Cream will assist in preventing the cracking & peeling when proper cleaning is also done.

Simply apply the Leather Protection Cream to a soft cloth and wipe it on evenly, paying particular attention to high use areas like seats, arms, front railings, and backs.

For Aniline Leathers, it is best to apply the Leather Protection Cream twice to all the high use areas. We recommend fully cleaning and reprotecting your furniture 2-4 times per year. When leather is placed in high use rooms (TV area), it may be required to clean and reprotect more often.

Pieces like recliners are subject to very heavy use. With leather, it is much easier to practice prevention than it is to try to resolve major challenges after the fact.

Leather Protection Cream will also work to remove small surface scratches on Aniline Leathers. In general, the Leather Protection Cream is used as a final step in combination with most of the Leather Master repair or touch-up products.

LEATHER CARE KITS

For Aniline and Pigmented leathers.

All of our Kits contain 2 products for taking care of your leather.

Leather Soft Cleaner will clean various types of stains and soiling from Aniline and Pigmented leather. It is a water based product that penetrates into the surface to clean without harming your leather.

Leather Protection Cream is a product which will assist in repelling staining and soiling on your Aniline and Pigmented leather. At the same time it keeps your leather soft. Because we always recommend using Leather Protection Cream and Leather Soft Cleaner in combination, we package them together in a complete kit.

AVAILABLE KIT SIZES

Packed per 36

LEATHER CARE KIT - LM 50

Contents

- 50 ml Leather Protection Cream
- 50 ml Leather Soft Cleaner
- 1 Brochure

Available with brochure in English, Italian, German, French, Dutch, Spanish.

Packed per 28

LEATHER CARE KIT with INK AWAY - LM 50i

Contents

- 50 ml Leather Protection Cream
- 50 ml Leather Soft Cleaner
- 8 ml Ink Away
- 1 Brochure

Available with brochure in English, Italian, German, French, Dutch, Spanish.

Packed per 24

LEATHER CARE KIT - LM 75

Contents

- 75 ml Leather Protection Cream
- 75 ml Leather Soft Cleaner
- 1 Soft Cloth
- 1 Sponge
- 1 Brochure

Available with brochure in English, Italian, German, French, Dutch, Spanish.

Packed per 24

LEATHER CARE KIT - LM 100

Contents

- 100 ml Leather Protection Cream
- 100 ml Leather Soft Cleaner
- 1 Soft Cloth
- 1 Sponge
- 1 Brochure

Available with brochure in English, Dutch, German, Spanish, Italian, French, Finnish, Portuguese, Turkish, Hungarian, Japanese, Chinese, Russian, Korean, Slovenian, Croatian.

NUBUCK CARE

kits and products

Leather Master range includes special kits and products for the cleaning, maintenance and protecting of all nubuck and suede leathers. With these products, you can remove soil, water-based stains and oil-based stains from your nubuck leather garment, shoes and upholstery. In addition, the Nubuck Protector offers protection that prevents most stains and allows for more effective cleaning.

Packed per 12

NUBUCK CLEANER - Leather type for N

Size: 50 ml - 140 ml - 250 ml

Nubuck Cleaner will clean most stains and soiling from nubuck leathers. It is a water based product that penetrates into the surface to clean without harming your nubuck leather.

Available with labels in English, German, French, Portuguese.

Packed per 12

NUBUCK DEGREASER - Leather type for N

Size: 75 ml - 300 ml

Nubuck Degreaser efficiently removes surplus fat and oil spots on Nubuck leather. It is to be used for oil based stains, usually associated with body and hair oils.

Available with labels in English, Dutch, German, Spanish, Italian, French, Portuguese.

Packed per 25

NUBUCK CLEANING CLOTH - Leather type for N

This specially-treated cloth is the easiest method for removing soiled spots from Nubuck leather. It is designed to remove surface soiling as well as reverse flat and shiny areas. Nubuck Cleaning Cloth is an efficient, environmentally safe cleaner for your upholstery, garment, handbags and shoes in nubuck or suede. This specially treated cloth offers amazing result without chemicals and it will return the leather's original Nubuck feel and effect.

Available with brochure in English, German, Dutch, French, Italian, Spanish, Finnish, Swedish, Danish, Norwegian, Japanese.

Packed per 12

NUBUCK PROTECTOR - Leather type for N

Size: 200 ml - 400 ml

Nubuck Protector protects efficiently sensitive leathers, such as nubuck, suede and aniline, against food and drink stains and dirt. It provides oil-water-alcohol repellency.

Available with labels in English, Dutch, German, Spanish, Italian, French, Portuguese.

Packed per 12

INK KILLER - Leather type for N

Size: 50 ml

Ink Killer is a stain remover (cleaner, detergent) for biro pen marks. For nubuck leather and suede.

Available with labels in English.

Packed per 12

NUBUCK ECO-PROTECTOR - Leather type for N Size: 500 ml

Nubuck Eco-Protector is a dramatic change from previous protection products for Nubuck leathers. It is a water-based product for Nubuck and highly sensitive leathers. This product provides excellent protection against oil, water and alcohol based stains. Nubuck Eco-Protector will assist in repelling stains and soil on your Nubuck leather.

Available with labels in English, French.

Packed per 24

NUBUCK CLEANING KIT - LM 50

Specially designed to clean and revitalize your Nubuck leathers.

Contents

- 50 ml Nubuck Cleaner
- 1 Nubuck Cleaning Cloth
- 1 Sponge
- 1 Brochure

Available with brochure in Italian, French, English, Dutch, German, Spanish, Finnish, Portuguese.

Packed per 24

NUBUCK CLEANING KIT - LM 140

Specially designed to clean and revitalize your Nubuck leathers.

Contents

- 140 ml Nubuck Cleaner
- 2 Nubuck Cleaning Cloths
- 2 Sponges
- 1 Brochure

Available with brochure in Italian, French, English, Dutch, German, Spanish, Finnish, Portuguese.

Packed per 12

NUBUCK CARE KIT

Specially designed to clean and protect your Nubuck leathers.

Contents

- 200 ml Nubuck Protector
- 140 ml Nubuck Cleaner
- 75 ml Nubuck Degreaser
- 2 Nubuck Cleaning Cloths
- 1 Sponge
- 1 Brochure

Available with brochure in Italian, French, English, Dutch, German, Spanish, Finnish, Portuguese.

Packed per 12

NUBUCK ECO PROTECTION and CLEANING KIT

Specially designed to clean and protect your Nubuck leathers.

Contents

- 500 ml Nubuck Eco-Protector
- 250 ml Nubuck Cleaner
- 2 Nubuck Cleaning Cloth
- 3 Sponges
- 1 Spray nozzle

Available with labels in English, French.

SPECIALTY KITS

BYCAST LEATHER CARE KIT

Specially designed to clean and maintain your Bycast leather.

Packed per 24

Bycast Leather Cleaner will clean most stains and soiling from Bycast leather. It is a water based product that penetrates into the surface to clean without harming your Bycast leather.

Waxon gives the Bycast leather its suppleness and its beautiful lustre. It restores the leather's original look and feel, and eliminates scratches caused by finger nails.

Contents

- 150 ml Bycast Leather Cleaner
- 150 ml Waxon
- 1 Sponge
- 1 Soft Cloth
- 1 Brochure

Available with brochure in English, Dutch, French, German, Spanish Italian.

WAX ON KIT - Leather type for A - N - P

Revitalizer and cleaner kit for Waxed Pull-Up leathers.

Packed per 24

Leather Soft Cleaner guarantees efficient but gentle cleaning.

Waxon gives the wax pull-up leather the fats and nutrients that it needs in order to retain its suppleness and its beautiful lustre. Wax is often applied to the surface to achieve a particular feel or effect. It often looks like crinkled wax paper.

Waxon replaces the wax from the surface as it wears off.

Often a center of a seat cushion looks lighter or there are fingernail marks that won't rub out. This is from the wax coming off. Application of Wax On will solve this challenge.

Contents

- 250 ml Leather Soft Cleaner
- 250 ml Waxon
- 2 Soft Cloths
- 2 Sponges

Available with labels in English, Dutch, French, German.

OLEOSA KIT - Leather type for A - P

Revitalizer and cleaner kit for Oil Pull-Up and oiled leathers.

Packed per 24

Leather Soft Cleaner guarantees efficient but gentle cleaning.

Oleosa gives the leather the fats and nutrients that it needs in order to retain its suppleness and its beautiful lustre.

Oleosa contains the same type of fat liquors used originally to give the leather its feel and effect. Oleosa also contains the same protection effect found in Leather Protection Cream. This product works great for removing surface scratches from these Leather types.

Oleosa may diminish the wax effects on some oil and wax pull up Leathers. It is best to pretest the product on a hidden area of the Leather to judge its effect on wax type pull-ups. Oleosa with Protection should be applied 1-2 times per year.

Contents

- 250 ml Leather Soft Cleaner
- 250 ml Oleosa
- 2 Soft Cloths
- 2 Sponges

Available with labels in English, Dutch, French, German.

HIGH-TECH LEATHER CARE WIPES

High-tech leather care wipes is the new system for applying the Leather Master products developed by the Unifers Research Centre. The High-tech leather care wipes system offers two advantages.

It is: • easy to use • quick to take effect

The product is ready for use inside the packet: there is no need for any preliminary preparations. The wipe is made of a soft, but strong fabric that safeguards the surface of the leather. High-tech leather care wipes, the easiest way to look after leather.

Packed per 24

EASY LEATHER CARE KIT

This kit contains 16 wipes for the cleaning and protection of your leather.

Contents

8 High-Tech Strong Cleaner Wipes

8 High-Tech Protection Cream Wipes

Available in English, Italian, German, Dutch, Spanish, French, Finnish.

Leather Cleaning Wipe

Packed per 240

SOFT CLEANER

Cleans most common dirt and stains.

Strong Cleaner contains a highly effective detergent for stubborn dirt. It can be used on all type of leather except nubuck and suede. Strong Cleaner is specially suitable for cleaning leather armchairs, sofas, seats, shoes, handbags and clothing.

Also available in box (12 wipes) or in tubs (60 wipes).

Available in English, Italian, German, Dutch, Spanish, French, Finnish.

Leather Cleaning Wipe

Packed per 240

STRONG CLEANER

Cleans stubborn dirt.

Strong Cleaner contains a highly effective detergent for stubborn dirt. It can be used on all type of leather except nubuck and suede. Strong Cleaner is specially suitable for cleaning leather armchairs, sofas, seats, shoes, handbags and clothing.

Also available in box (12 wipes) or in tubs (60 wipes).

Available in English, Italian, German, Dutch, Spanish, French, Finnish.

Leather Cleaning Wipe

Packed per 240

UNIVERSAL CLEANER

High power cleaner for resistant leather upholstery.

Universal Cleaner contains a highly effective detergent for cleaning strong leather upholstery like car, motorcycle, boat and aeroplane seats. It can also be used on other strong coloured leather articles like shoes and handbags. It is not suitable for aniline leathers, nubuck or suede.

Also available in box (12 wipes) or in tubs (60 wipes).

Available in English, Italian, German, Dutch, Spanish, French, Finnish, Portuguese, Russian, Chinese, Polish, Hungarian, Korean.

HIGH-TECH LEATHER CARE WIPES

Leather Protecting and Revitalising Wipe

Packed per 240

PROTECTION CREAM

Protection against water, oil and alcohol stains, perspiration marks, and every day wear.

Protection Cream provides excellent protection against water, oil and alcohol stains for aniline and dyed leathers. It protects leather against every day wear, perspiration and greasy skin marks. Protection Cream is not suitable for nubuck and suede.

Also available in box (12 wipes) or in tubs (60 wipes).

Available in English, Italian, German, Dutch, Spanish, French, Finnish, Portuguese, Russian, Chinese, Polish, Hungarian, Korean.

Leather Protecting and Revitalising Wipe

Packed per 240

OLEOSA

Protective and revitalising Wipe for Pull-Up & Oiled Leathers.

Oleosa is specially formulated for pull-up and oiled leathers. It protects the surface of the leather against stains and eliminates scratches, restoring the leather's original look and feel.

Also available in box (12 wipes) or in tubs (60 wipes).

Available in English, Italian, German, Dutch, Spanish, French, Finnish.

Leather Revitalising Wipe

Packed per 240

WAXON

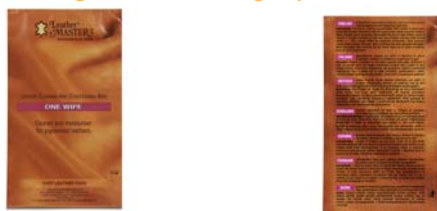

Revitalising wipe for waxed pull-up and Bicast leathers.

Waxon is specially formulated for waxed pull-up and Bicast leathers. It restores the leather's original look and feel, and eliminates scratches caused by nails and other types of scuff marks. Waxon also helps keep Bicast leather supple and crack resistant.

Also available in box (12 wipes) or in tubs (60 wipes).

Available in English, Italian, German, Dutch, Spanish, French, Finnish.

Leather Cleaning And Conditioning Wipe

Packed per 240

ONE WIPE

Cleaner and moisturiser for pigmented leathers. Formulated to assist you in: cleaning, reducing soiling build up, reviving appearance and improving suppleness.

Available in English, Italian, German, Dutch, Spanish, French, Finnish.

Leather Cleaning Wipe

Packed per 240

WIPE OUT

Cleans and removes smells from all types of leather.

Available in English, Italian, German, Dutch, Spanish, French, Finnish.

SPECIALTY PRODUCTS

Packed per 12

LEATHER VITAL - Leather type for A - P
Size: 250 ml - 1 liter

This product is for revitalizing older Leathers and also to improve the feel of stiff Leathers. Leather Vital penetrates the Leather to soften and nourish it. This product is often used to solve the complaint that the Leather doesn't feel as soft as the floor model and similar comments. Leather Vital can also be used when doing repair work to help soften the area being worked on and to dilute some of the pigments. Leather Vital is excellent for stopping the squeaking noises that can happen from Leather in contact with Leather. This noise is especially common with Leather motion furniture.

Available with labels in English, Italian, German, Dutch, French, Portuguese.

Packed per 12

STRONG CLEANER - Leather type for A - N - P
Size: 250 ml - 1 liter

Leather Strong Cleaner is a mild, water based cleaner that can be used on a most aniline and pigmented leathers. It will clean soiling as well as most water based stains.

This product is used in the same manner as Leather Soft Cleaner, but its action is more intensive thanks to the greater concentration of active substances. The difference in this product is that it has twice the active cleaning ingredients. Strong Cleaner can be used on all Leathers types. It is very important that you use the product in combination with a sponge to foam the product, and a cloth to wipe away the excess dirt. This product does not remove the finish from any Leather that has the proper rub resistance standards.

Available with labels in English, Italian, German, Dutch, French, Spanish, Portuguese, Finnish.

Packed per 24

RAPID CLEANER S - Leather type for P only
Size: 100 ml - 200 ml - 1 liter

Rapid Cleaner S is a concentrated cleaner for resistant upholstery leather, especially car seats, airline seats, motorcycle seats or other pigmented leathers, and resistant shoe and handbag leathers. Do not use on Aniline leather, nubuck or suede. This product has a spray nozzle.

Available with labels in English, Italian, German, Dutch, French, Spanish, Portuguese.

Packed per 24

UNIVERSAL CLEANER - Leather type for A - N - P
Size: 200 ml - 1 liter

Universal Cleaner contains a highly effective detergent for cleaning leather upholstery like car, motorcycle, boat and aeroplane seats. It can also be used on other strong coloured leather articles like shoes and handbags. This product has a foamer cap.

Available with labels in English, Italian, German, Dutch.

SPECIALTY PRODUCTS

Packed per 12

SUPER CLEANER - Leather type for P only
Size: 50 ml

This product removes blue jeans transfer, newspaper print and deep stains like mustard from Protected Leathers. This product works when nothing else will clean the Leather. Often on light color Leathers, it appears that the color is coming off the Leather. What actually has happened is a transfer of color to the Leather's surface from blue jeans and/or newspaper print. You can water this product down with distilled water to create a less aggressive product.

Available with labels in English, Italian, German, French.

Packed per 12

FOAM CLEANER - Leather type for A - N - P
Size: 400 ml

This is an aerosol version of our Strong Cleaner. The advantage that Foam Cleaner has, is that you can clean with a minimal amount of moisture. Foam Cleaner has the consistency of shaving cream when applied and is great for sensitive leathers like Nubuck (N) or Aniline (A) types.

Available with labels in English, Italian, German, Dutch, French, Portuguese.

Packed per 24

INK AWAY - Leather type for P only*
Size: 8 ml - 25 ml

This is an easy to use product for the removal of ink & lipstick from Protected (P) Leathers. It works best when used with our system of Leather Protection Cream on the Leather first. It is designed for removal of recent (3-5 days) ink on Leather. It will not remove permanent markers from Leather.

Available with labels in English, Italian, German, Dutch, French, Spanish, Portuguese, Hungarian.

* If used on ANILINE (A) Leather, this product may cause a dark spot.

The spot will dissipate in 1-2 days. On Aniline the ballpoint mark may fade somewhat or be removed completely.

Packed per 12

LEATHER DEGREASER - Leather type for A - N - P
Size: 75 ml - 300 ml

This product is for the removal of oil (usually from hair and skin) from Leather. Apply Leather Degreaser to the Leather, and it dissolves the oils and transforms them into a powder that is more absorbent than the Leather. This is an aerosol product containing solvents. Use it with proper ventilation only. Please read and follow all safety precautions regarding this product! When a grease or oil stain has built up gradually over several years, it cannot be removed in a few minutes. Your patience is necessary to complete the job. Also, stains left untreated for a long time may have caused additional challenges like loss of color.

Available with labels in English, Italian, German, Dutch, French, Portuguese.

SPEW REMOVER - Leather type for A - N
Size: 50 ml

Packed per 12

This is a term for natural fats that spew from the inside of the Leather to the surface. It can make the Leather look like it has a milky film or a haze on it. This residue will wipe away with a cloth, but it will continue to reappear unless it is removed with this product. This product removes the surface fats and absorbs into the Leather and prevents the spew from reappearing.

Available with labels in English, Italian, German.

LEATHER MOUSSE - Leather type for P
Size: 200 ml

Packed per 24

Cleaner and moisturiser for pigmented leathers. Leather Mousse has been specifically formulated to work with your leather furnishings. It is only for use on "finished" leathers (not suede or nubuck). By applying the Leather Mousse, you are protecting your investment from potentially damaging effects of everyday use. Leather Mousse has been specifically formulated to assist you in: cleaning, reducing soiling build up, revives appearance and improves suppleness.

Available with labels in English, Portuguese.

ODOUR REMOVER - For all types of leather for A - N -P
Size: 200 ml

Packed per 12

Odour Remover eliminates bad smells from all types of leather. It is not a perfum but a true odour neutralizer.

Available with labels in English, Italian.

VINYL CLEANER
Size: 200 ml

Packed per 24

Vinyl Cleaner is a water based cleaner that can be used on any PVC or polyurethane material. It will clean soiling as well as water based stains but will not remove permanent markers or ball point stains.

Available with labels in English, German, Dutch.

HIDE RUG CLEANER
Size: 1 kg • 10-20 m²

Packed per 12

Hide Rug Cleaner is a dry cleaning powder and spot remover for cow skin rugs. This powder is highly effective and also extremely practical because you can walk on the carpet almost immediately after its application.

Available with labels in English, Italian, German, Dutch, French, Portuguese, Finnish.

COLOUR LINE KITS

These kits are designed for leather that has medium to light fading. Each kit includes the appropriate cleaner and application products. All Colour Line Kits are available in 60 standard colours. Each colour is available in Pigment or Aniline versions. White is not available in Aniline colour. A neutral transparent product is available to lighten up aniline colours.

Computerized color machine

Leather Masters' goal is to anticipate its 'customers' needs.

Leather Master is proud to provide a new, advanced computerized color reading and mixing system.

This system enables us to read and re-create the formulation of any color.

This high-tech computerized matching and mixing system allows our customers to have their own touch-up colors.

Color cards

Illustrate 60 popular color choices. All color kits are available in these colors at no additional charge.

Each color is available in Pigment or Aniline versions. White is not available in Aniline color.

A neutral transparent product is available to lighten up aniline colors.

COLOUR LINE PIGMENTED KIT - Leather type for P only

This kit is used for repairing light to medium cracking and fading for Pigmented leathers.

Strong Cleaner is a mild, water based cleaner that can be used on a most aniline and pigmented leathers. It will clean soil as well as most water based stains. **Colour Line Pigmented** is a water based product containing pigments dispersed in water. They fix them self containing an fixations agent. These have the advantage of being able to be applied by hand or by spraying. Therefore Colour Line Pigmented is very easy to use and suitable for repair technicians as well as for consumers. Available are 13 standard base colours and in addition 60 pre-mixed.

Packed per 18

This product is very unique for it does several things at once:

- It contains a fixations agent to ensure the colour has proper adhesion to the leather.
- It contains filling materials to help fill in light cracks and surface damage.
- Contains a water based pigment to colour cover the damage or dirt enclosure.
- Contains a finish to prevent the product from transferring into cloth of driver and passengers and to give the surface resistance. The resistance will improve by time and heat.

Contents

140 ml	Strong Cleaner
140 ml	Colour Line Pigmented
1	Sponge
1	Soft Cloth
1	Glove
1	Brochure

Available with brochure in English, Dutch, German, French, Italian, Spanish, Finnish.

COLOUR LINE ANILINE - Leather type for A only

This kit is designed to restore colour to Aniline leathers. It is also great for shading unmatched panels on Aniline leathers. Lighter panels can be shaded to match darker panels.

Leather Soft Cleaner is a waterbased cleaner that can be used on all Leather types. This is a mild cleaner that will not affect the Leather's original properties or finish. Leather Soft Cleaner will clean most soiling as well as waterbased stains.

Most cleaners contain solvents like alcohol or mineral spirits. These types of cleaners will definitely clean, but also will attack either the finish or dry the Leather out. Leather Soft Cleaner is solvent free and works without removing finish or harming the Leather.

Colour Line Aniline is a transparent Aniline dye stuff. That means it is similar to putting colored lenses on the leather. It will not cover up damage like pigment will. It will only colour the area, and you will able to see the surface.

Packed per 18

It also does several functions in a single application:

- Has a fixation agent to insure adhesion of the colour to the leather's surface.
- Provides additional protection effect to the leather.
- Allows for recoloring of Aniline leather without changing the feel.
- Will not transfer onto clothing.

Contents

140 ml	Leather Soft Cleaner
140 ml	Colour Line Aniline
1	Sponge
1	Cloth
1	Glove
1	Brochure

Available with brochure in German, English, Dutch, French, Spanish, Finnish, Italian, Portuguese.

COLOUR LINE KITS

COLOUR TOUCH-UP KIT - Leather type for A & P

This is a smaller version of our Colour Line Kits for minor touch up (scuff, rubs, etc). This product is designed for repairing light to medium cracking and fading on Aniline and Pigmented leathers. It is available in 60 standard colours.

Colour Touch-Up is a colour cream for repairing light to medium cracking and fading on aniline and pigmented leathers.

Leather Protection Cream is a water based protector for all leather types, except nubuck and suede leather.

It provides excellent protection against oil, water and alcohol based stains as well as help resist the effects of every day soiling. At the same time it keeps your leather nice and soft.

Contents

- 50 ml Colour Touch-Up
- 50 ml Leather Protection Cream
- 1 Soft Cloth
- 1 Brochure

Available with brochure in German, French, Dutch, Spanish, English, Italian.

Packed per 24

SUNSAFE KIT - Leather type for A & P

It is a comprehensive care kit for light sensitive Leathers. It contains the components for cleaning, protecting & color refresh. The Sunsafe Kit is available in the 60 standard colors off the Color Card or custom colors. It is available for Aniline or Protected Leathers.

The Sunsafe Kit has the same components as the Colour Line Aniline or Pigmented kits with the addition of the Protection Cream. This allows you to have the products for protection, cleaning & color refresh in one package.

Contents

- 140 ml Sunsafe Color
- 140 ml Sunsafe Cleaner
- 140 ml Sunsafe Cream
- 1 Soft Cloth
- 1 Sponge
- 1 Glove
- 1 Brochure

Available with brochure in German, English, French, Dutch.

Also available: 250 ml and 1 liter • Packed per 24

- 1 Repair Video CD

MARKETING AND TRAINING MATERIALS

Leather Master has several items designed to assist in displaying and demonstrating the care products and assist in explaining leather to your customers.

Displays

Leather Master offers a standard tabletop display. The display is designed to hold Maxi Size Kits. Additionally, the display is designed to accommodate a Strong Cleaner, a Leather Vital, 6 Ink Lifters, Soft Cleaner and Leather Protection Cream.

Leather University® Trainings

Leather can be complex and mysterious. Our Leather University® Training Program attempts to unmask this category. The course covers: leather as a raw material, the tanning process (raw hide to crust), finishing processes, special effects, care and maintenance, and problem solving. Each participant is given a Leather University® Training Book, and Tanning Process Swatches to take home with him or her to expand the knowledge of their organization. This program is designed primarily for key personnel, emphasizing a “train the trainer” format. Call Leather Master for details. Demonstration center. The Leather Master Demonstration Center lets you show the consumer how great the products work! Anything you can show is easier to sell. Also, it gives you the platform to take the time to explain and show leather care in detail. The demo center comes complete with all the products and leather samples and is ready to use.

Leather Lifestyle Cards

These business card-size cards reflect the compatibility of different leathers with your customers' lifestyle.

Sales associate study guide

Our Sales Guide provides useful information for understanding and selling leather, be personalized with your logo.

MARKETING & TRAINING MATERIALS

Leather Type & Care Posters (see page 7 - 8 - 9)

These properties are designed to highlight the characteristics of the three leather types (A-N-P). Each poster describes the characteristics, preventative maintenance, and general care information for each leather type. The size is standard poster size (61 x 91 cm). Please refer to pages 3-4 to see these posters in miniature form.

Consumer leather care video

This video is designed to explain to the consumer basic information on the following topics: differences in leather types, basic tanning information, why leather care is important, how to use Leather Master Products and when to do maintenance. Running time is 8 minutes.

Hang tags

These Hang-Tags highlight the characteristics of the three leather types (A-N-P), as well as the characteristics, preventive maintenance, general care information.

Private label marketing

We work closely with manufacturers and retailers of furniture, cars, garments, handbags, luggage, motor cycle wear and every other imaginable item in Leather. Use of our Leather products and care tips can often facilitate the needs of both parties.

Brochures & hangtags

It is our goal to incorporate the unique features of your Leather items and to provide consumer care information in a handout for the end user. We can assist or completely design the type of literature to drive sales and reduce claims.

These Hang-Tags highlight the characteristics of the three leather types (A-N-P), as well as the characteristics, preventive maintenance, general care information.

Deck labels

These properties were designed for furniture but could have similar applications for other items. These are available in a self-adhering types for detachable seat cushion models and sewn in models for attached cushions. Both are made in a satin material to eliminate noise and maintain appearance. Your company name is easily adapted to this format and minimal quantities are required. This gives your consumer the detailed information and support needed to prevent dissatisfaction and increase long term satisfaction. For detailed information, please call Leather Master.

MARKETS

Uniters' understands the importance of identifying new market opportunities which enable the company to expand its target audience and to maintain product diversity.

UNITERS' products and services cover the following market segments:

UPHOLSTERY

AUTOMOBILE

MOTORCYCLING

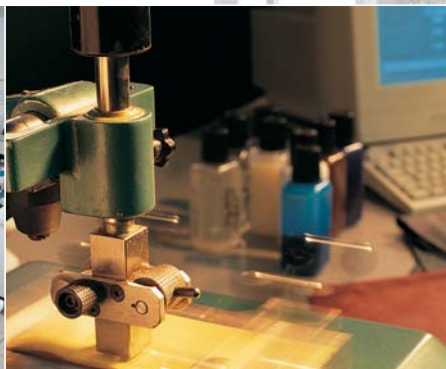

BOATING

FASHION

AVIATION

THE RESEARCH CENTRE

The Research Centre is the heart of UNITER. It is here where science meets the inventive and creative capacity of man. It is the core around which everything in UNITER revolves, and is always responsible for the first phase in the life cycle of any product and all the subsequent sales and marketing activities associated with it.

This is where Dr. Leo Tork and his international team of researchers ensure that UNITER products give users exactly what they need and where all new UNITER cleaning and protection products and solutions are created.

The Research Centre is the place where thought and reflection merge with machinery and technology to guarantee unbeatable results.

PRODUCTION

UNITERS has based its production on high-tech plant facilities and sophisticated production procedures to guarantee unsurpassed quality in terms of product and order implementation.

UNITERS has invested in the state-of-the-art fully computerised mixing systems to turn the formula perfected by the team at the Research Centre into large volumes of finished product.

The bottling lines are completely automated to ensure flexibility of control as well as compatibility with all UNITERS product types, container sizes and labelling requirements.

ISO AND OHSAS CERTIFICATIONS

Uniters guarantees that all its products and services are conform to the strictest standards of quality, reliability, performance, environment and safety. Respect for precise manufacturing procedures has earned Uniters S.p.A. the ISO 9001 Quality Certificate.

To optimise its environmental policy, Uniters obtained the UNI EN ISO 14001 Environmental Certification.

In 2005 UNITERS has also achieved the OHSAS 18001 certification for workforce health and safety.

Finally, in 2006, Uniters achieved the Certificate of Excellence, an official document given by the agency to companies that have obtained the three certifications in respect of Quality, Environment and Safety.

UNI EN ISO 9001:2000 Quality Certificate.

UNI EN ISO 14001:2004 Environmental Certificate.

OHSAS 18001 Workforce Health and Safety Certificate.

Certificate of Excellence.

CUSTOMER SERVICE

Multimaster-Uniters uses call centres on 4 continents: in the United States (for the North and South American markets), Great Britain, Netherlands (for the European market), Japan and Australia.

Multimaster-Uniters works closely with leading manufacturers to provide after sales service for leather and fabric upholstery. To deliver this service the Multimaster-Uniters Group uses an international network of experts with the technical competence necessary to solve all sorts of problems involving dirt, stains, fading and repair.

MARKETING AND COMMUNICATIONS

UNITERS places its' Marketing and Communications department at the disposal of its' customers to help design and implement packaging and communication solutions that match their company strategies and marketing plans.

A team of graphic designers is ready to process any request for custom box designs, labels and leaflets and to creatively but functionally interpret customers' special communication needs.
