

VISION

Like looking out of a window or down a stairwell. Spaces that get smaller and smaller,

forming a 3D frame that both heats and decorates. Spaces that create an absolutely

novel radiator that will never go unobserved: only later is it discovered and remarked upon.

Design Luigi Brembilla

Electric and mixed versions, p. 232

VISION-ST

Design Luigi Brembilla

VISION-ST: a series of vertical spaces that, combined, form a rectangle of volumes to decorate, hang things on, heat the room

and never pass unobserved. Vision-ST is a surprising solution, its heating function taking a back seat. The top shelf,

formed by square heating elements, also acts as a clothes horse.
