miniland

60 years of shared history

The journey is always better when we do it in a good company. And so we have felt since in 1962 we started to give shape to our project.

Throughout this time, we have evolved and we also have anticipated what was to come. We are very happy to have had the opportunity to be involved in the educational work of so many families, teachers and caregivers to build the tomorrow we believe in. And of having done it in the way we like it best: in a team work.

Along our history, we have created hundreds of solutions with an unique goal: helping children to grown up inside and out.

We are Miniland

To those who believe children are the promise of a better world, Miniland is the expert brand in promoting progress, listening and designing what society longs for, taking care of the present to improve the future.

Our Purpose:

Transforming the present to construct a better world for tomorrow.

Our values:

Naturally diverse

We know every child is different, without forgetting that everyone is special. We seek to build shared values such as respect, equality, self-esteem or gratitude.

Driving progress

We know that a bright future is the sum of new beginnings that we share together. For this reason, our objective is to give meaning and respect to one's development by respecting people and the environment around us, so we may enjoy the journey together.

Truly honest

We wish to promote a better tomorrow for everyone, so we are coherent with what we say and what we do. We rely on the truth to guarantee a fairer world in which we can thrive.

Creators of possibilities

The future belongs to children and we believe no one can expect it to be better if we don't innovate in the present.

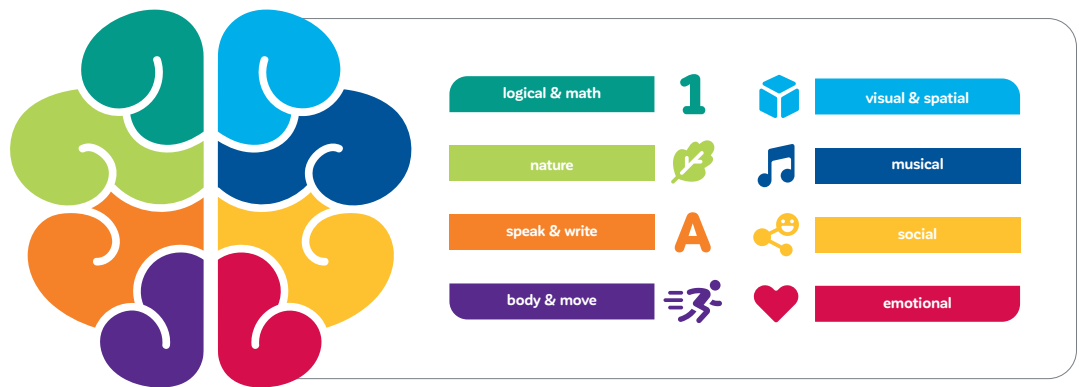

We encourage creativity to open new spaces where we can grow together, focusing on constant improvement.

miniland

Developing Multiple Intelligences

Inspired by **Gardner's Theory of Multiple Intelligences**, according to which intelligence in children is not a single, static quality, at **Miniland** we believe that empowering twenty-first-century skills with multiple play experiences will encourage the formation of communities of educators and children inspired by active collaboration, collective creativity and continuous learning.

Our Key Points

1. Our toys, tools and resources challenge young students to learn in a balanced way, evolving beyond current educational standards in harmony with the **Theory of Multiple Intelligences**.
2. They enable educators to teach from multiple approaches while detecting each child's innate abilities, talents and intelligences.
3. And attain and surpass the different phases of educational development from multiple mental frameworks and detect each child's innate skills and intelligences.
4. Children will develop a deep level of understanding from multiple angles that enables them to put into practice what they learn, both inside and outside the classroom, individually and collectively.
5. The multiple intelligences is a practical approach that promotes the multiple learning, combining play experiences based on physical and digital environments with **miniland teach&play** (minilandteachandplay.com).

Infant & Toddler

A collection of toys for the little ones to explore the world through their senses

Learning is based on emotion, which is the reason why this collection of toys for children up to 3 years old aims to awaken **their curiosity and stimulate their senses**. With it, the little ones will find surprises, multisensory experiences, and holistic suggestions for the milestones they will encounter during the early stages of their life.

Our SEL Collection

Miniland, our commitment to SEL & DEI

For more than 60 years, we at Miniland we have developed numerous educational toys that help promote emotional intelligence and develop social skills in. For us, SEL and DEI are in the heart of our brand.

Here we present a brief selection of the toys that can help you implement those methodologies from first educative stages. In this section, you will find a selection of educational toys that can help you implement this methodology in your classroom from the early stages of education.

What is SEL?

Social emotional learning (SEL) is a methodology that helps students to better understand their emotions and develop empathy for others.

This will help them to create frameworks to achieve their goals and build positive relationships with others but also to make positive and responsible decisions in the present and in the future.

SEL involves five core competencies that can be applied in both the classroom, at home, and in students' communities. These five core competencies are:

- **Self-awareness**
- **Self-management**
- **Social awareness**
- **Relationship skills**
- **Making responsible decisions**

What is DEI?

Diversity, Equity and Inclusion (DEI) is a term used to ensure all people, regardless of origin, gender, or other demographic attribute, are able to succeed in their environment.

Enhancing diversity, equity and inclusion (DEI) is a major priority for many schools. At Miniland, as educational toy experts we understand that diversity is less about what makes children different- their origin, ethnicity, gender, functional diversity or any kind of diversity- and more about understanding, accepting and valuing those differences.

Light Tables & Resources

The translucent effect

Discover all our new resources for Miniland lightpads: a selection of translucent materials to make the most of this sensorial and manipulative activity that **promotes the stimulation and help the little ones to focus**.

With our translucent resources, kids will be able to have an active role, think and experiment through manipulation of elements in different shapes and colors. So they will learn in an easy self directed environment while having fun. An approach based on **Reggio Emilia educational pedagogy** and her principles of respect, responsibility and community through exploration, discovery and play.

Eco-Friendly Collection

For a More Sustainable World

We are placing our grain of sand in developing **eco-friendly toys** that are more respectful of our environment. Little ones will learn the importance of taking care of the planet we live in while having fun playing!

The toys continue to be highly resilient and durable which allow them to be used for a longer period of time and therefore also contributing to a more sustainable and responsible use.

Miniland's eco-friendly toys contain **natural materials** such as vegetable-originated fibers reducing their environmental footprint and not jeopardizing the toy's quality and overall properties.

Moreover, our wood from sustainable forests has been certified by FSC™ label.

A More Tolerant World Towards Diversity

With our dolls collection, we help little ones understand values of inclusivity and coexistence through play, by promoting empathy and accepting people of any origin, gender or condition.

Our anatomically correct dolls are the perfect toy to learn **SEL (Social & Emotional Learning)**, to enhance social abilities and creativity by free playing in the classroom or even at home.

Every single one of our dolls is handmade in Europe. They are made of soft vinyl and they meet all the European and American safety standards and regulations.

Discover the Collection

We present various ranges in different sized versions. Highlighted by well defined features to help identify the **most representative features from children around the world**.

Their heads, arms and legs are jointed to provide them with mobility. And all of them are **anatomically correct**. Suitable for collective use.

75003

Emotions Buddy

Stuffed toy that helps children to identify emotions, the first step to being able to understand, express and verbalize them. Ideal for working on emotions from a young age and teaching children to express them, to feel heard and to develop self-esteem. The light module enriches the gaming experience by allowing a color to be associated with an emotion.

Content: 9 Velcro-backed pieces of felt with interchangeable facial features and 1 removable heart-shaped light module.

CPQ: 6 units 39 cm

Social & Emotional Learning

1-3 years

75004
Monster Telling

Soft multi-sensory book with pictures and movable elements designed to help to promote good habits between children. It includes three story tales that cover in a fun and stimulating way three milestones in a child's development, such as potty training, learning to sleep alone or washing their hands through good hygiene habits.

CPQ: 6 units 27,3 cm

The learning experience can be enhanced with Miniland's grow&fun app, with which children can listen to the stories in English or Spanish or even record them with the teacher's voice. In the classroom, they will also be able to listen to the tale in a group and practice reading, together with the physical toy.

MINILAND DOLLS

Dolls of the world

Our Miniland Dolls collection focuses on helping little ones understand they belong in the world: by promoting inclusivity and acceptance, identifying emotions, and respecting the feelings of others; all through the fun and value of play. Available in an array of ethnicities and genders, our Dolls hope to represent the beauty of our differences, respecting every child, no matter their origin, sex, or condition. In addition, our Dolls help enhance social and cognitive abilities and enhance creativity through independent play in the classroom or at home.

We want to contribute to a world that is more open, inclusive and tolerant towards diversity by promoting empathy and accepting people of any ethnicity, gender or condition.

Miniland Dolls

Miniland dolls collection awards

At Miniland we understand that we live in a colorful world where diversity is a constant reality. The skin color or physical features of a person don't need to be linked to any nationality or geographical area today, but in order to simplify the nomenclature of our dolls in this catalog, we will refer to them as "Caucasian", "Asian", "African" and "Hispanic", understanding that this is the origin of their ancestry and which has given rise to their characteristic phenotypic traits. Always from a perspective of respect and the desire to promote the value of tolerance towards diversity among children.

REMEMBER THAT YOU CAN EXTEND YOUR EXPERIENCE WITH THESE FREE DIGITAL RESOURCES!

Getting to know the parts of the human body & establishing relations between people's lives and atmospheric phenomena. Help children understand diversity.

EARLY CHILDHOOD

Feel to Learn! Discovering the world through sensations

Learning is based on emotions, so our collection of toys for children under three aims to awake their curiosity and stimulate their senses. Babies and toddlers will find surprises, multisensorial experiences and holistic proposals adapted to each development milestone. Moreover, they will enjoy playing with colorful toys, inspired by nature.

Sensory Cactus

Sensory toy in the shape of a cactus, including 8 soft pieces with different textures and colors that fit together to create fun and vibrant structures.

This toy is developmental as a teething aid, and progressing to lace-up play and later on to a stacking and construction game that challenges balance. It helps develop crucial skills such as spatial vision, reasoning, logic, and fine motor skills. The pieces are made of soft silicone for safe chewing and play, and the base of wood.

97343

Translucent colorful Lizard

A toy lizard that invites children to discover the world through colours and their mixtures by fitting the pieces together and experimenting with them. It contains 10 translucent pieces (2 of each colour). Two pieces can be fitted to each hole in the lizard's body, which creates the mixture of colours. The lizard's base can be placed vertically, allowing it to be used as eyeglasses for seeing the world in colours. The system of putting the pieces together and taking them apart is very simple and intuitive, making it easy for the youngest ones to use. The main body is made of recycled ABS.

SYMBOLIC

Imitating and pretending as they learn!

With a wide range of creative play products, kids can become anything they want to be—exploring make-believe lands and imitating real-life roles. Imaginative play helps girls and boys learn about themselves and their place in the world. It is therefore crucial to choose the correct pretend role play to help bring out the best in children especially in terms of their cognitive, social, and emotional development.

Foods

Miniland's food collection includes all kinds of fruit, vegetables and countless products found in everyday meals. Very life-like, they are made to life-size scale, highly resistant and with durable materials.

Similarly, the food packs are adapted for school use as they have a didactic guide for teachers that provides them full details of how to apply this material in the classroom.

They are, therefore, they are an excellent tool for promoting a healthy and balanced diet among children.

★ MINIMOBIL

Designed for fun and built to last

Minimobil vehicle sets strengthen hand-eye coordination skills and stimulate kids to understand cause and effect relationships as well as movement into different directions.

ECO FRIENDLY MATERIALS

At Miniland, we prioritize our commitment to the world we live in. That's why we actively contribute by creating environmentally eco-friendly toys. Our eco-friendly toys contain sustainable materials, that do not affect the product's durability or quality. We take care of kids, we take care of the planet.

+18
months

Miniland's classic Minimobils, now manufactured in eco-friendly materials to reduce their environmental impact. These fun didactic resources stimulate learning about the physical and social environment and can serve as support in the first steps towards Road Safety Education. A robust and durable design, with very safe non-removable wheels and high-strength axles.

BUILDING SETS

Building environments that encourage and enhance problem solving from a young age

We take building sets a step forward by offering a wide range of toy solutions aimed to develop strong motor skills, hand-eye coordination, spatial and social skills and, above all, a capacity for creative and divergent thinking.

At Miniland we take care of kids, we take care of the planet. And because we care about the world we live in, we have taken a step that brings us closer to sustainability with our eco-friendly toys collection, made with materials that reduce the environmental footprint and whose durability allows a more responsible and lasting use of the toy over time.

ACTIVE & OUTDOOR TOYS

Stimulating fresh creativity and well-being

Miniland outdoor learning toys encourage children to think of learning as an ongoing process instead of just something done in the classroom or at home.

Children's imagination is often stimulated by the objects around them and they quickly become more creative. With more room to play in, children are often more active when outside, which helps them build strong bones and good fitness levels and makes them feel happier and calmer.

Send a message

Send a Message enables kids to create messages in a cooperative and manipulative manner, promoting the structuring of children's language. It promotes the development of communication skills and helps develop language, the acquisition of new vocabulary and the structuring of phrases, while stimulating oral production and active listening among equals. A first approach to reading with a playful communicative focus

Content: 4 game boards, 64 pegs, 105 pictures and 1 teaching guide.

CPQ: 4 units  36,5 cm

36,5
cm

Send Your Message

The challenge is that between them, all members of one team have to stick pegs onto a base to create a message that the opposing team has to decode as soon as possible.

Detect the intruder

Players are asked to detect the word intruder. The goal is to become familiar with the different semantic fields. Only two peg bases will be used for this game.

The crazy message

The purpose of this dynamic is to work on children's creativity in a cooperative way. The participants have to send a message that they have made up spontaneously.

It helps children to structure language in a fun and very manipulative way. Very useful as a first contact with reading and writing, with a communicative and playful approach. Send a Message is an excellent resource for preparing language lessons, as it enhances the communication and oral expression of the players, whether playing in their mother tongue or with a multilingual approach.

It has three game dynamics, of increasing difficulty:

MATH

Making math fun!

It is important that kids are friendly with numbers and understand how they work. Here you can find a nice selection of toys encouraging kids to learn numbers, counting and numeral recognition. Color, hand-eye coordination and fine motor skills are also developed in a secondary level.

At Miniland we are concerned about the world we live in. That's why we want to do our bit by developing environmentally friendly toys. Our eco-friendly toys contain sustainable materials, such as vegetable fibers, that do not affect the product's durability or quality. We take care of kids, we take care of the planet.

32149

ECO Math Connectable Bears

This educational toy will help little ones to take their first steps in the world of mathematics. Its bear-shaped pieces are made of bioplastic produced from sugar cane. The foam base, where the pieces are placed, is also made of recycled materials, and the activity sheets are made of cardboard.

This game serves as a great help in developing visual and motor coordination, space orientation and as an introduction to mathematics. It also allows for working on the base both horizontally and vertically, as well as outside of it.

Content: 64 bears, 4 game bases and 20 activity sheets

Sorting Clothes Hanger

Fun and learning from everyday situations such as hanging clothes on a rack. By classifying garments, kids will begin to take their first steps in mathematical reasoning (discriminating, differentiating and classifying) and will better understand atmospheric phenomena, while developing fine psychomotor skills and spatial vision.

Content: 1 card holder, 4 hangers, 1 rack base, 4 color cards, 4 weather cards, 48 clothing pieces and 1 teaching guide.

95203

Activity Cubes

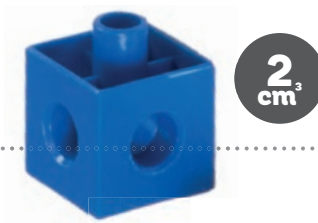

Set of cubes in assorted colors designed to promote the visual learning of mathematics through manipulation, providing a better understanding of mathematical logic concepts. This activity enables teachers to create different games and challenges to encourage children to discover and experiment with the first notions and concepts of mathematical logic on their own. Manufactured in highly resistant plastic, the 6 faces of the cubes fit into each other, enabling us to use them to relate numbers to amounts, replicate colors and the manner of working with rulers, compare and order amounts visually, play logic and reproduction games in 3D, break up planes, identify squares and other geometric figures, and the organization of spatial vision.

RESOURCES

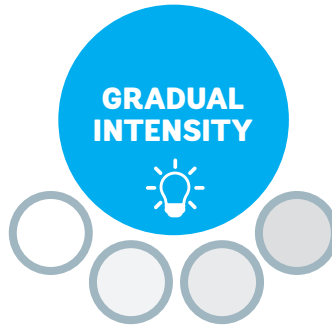

In this last part of the catalogue, we present a series of materials that can be used within the classroom to complement equipment in general.

+3
years

A perfect resource to enhance learning by playing with translucent accessories, including drawing and painting by tracing. It helps children concentrate because it makes them focus on the material that they are playing with.

For use in combination with Miniland references that are suitable for light tables.

Naturkid bottle chip

Content: 1 bottle.

CPQ: 6 units Ø6,5cm x 17cm

- Made of steel
- Anywhere
- No spills
- Soft touch
- Name tag
- Wide mouth

85396

Naturkid bottle foxy

Content: 1 bottle.

CPQ: 6 units Ø6,5cm x 17cm

Manufactured in 18/8 steel (304 steel). Miniland's little bottles preserve hot or cold drinks for longer thanks to its stainless steel wall, so that the little ones are well hydrated at school, on excursions and everywhere.

The quality of its materials allows to prolong its use and reuse in time, contributing to the sustainability of the environment. With attractive colors, a fun design and soft rubbery touch outside.

They include label with a fun sheet shape to write the name. They have a wide mouth for easy filling and cleaning. They also include anti-drip cap with washer to avoid loss and protect from unwanted spills during transport. Bisphenol A free and 100% BPA free.
